Office Action Summary

Art Unit 1771

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Dobashi et al. substantially for reasons already of record as further modified by the following observations.

Applicant has deleted the presence of the tackifier

"phenol/hydrogenated terpene copolymer resins" from the claims, so the previously relied upon rationale has been further modified as follows. Note particularly the disclosure at column 9 lines 35-46, particularly the teaching that the tackifier which may be used can include "aliphatic, aromatic or allcyclic petroleum resins and those modified, for example by hydrogenation". Accordingly, the last sentence is believed to either expressly, or inherently read upon the last two species of applicant's Markush grouping of suitable tackifiers which includes "hydrogenated aliphatic/aromatic copolymer petroleum resins and aliphatic/aromatic copolymer petroleum resins". . Note also that the reference further teaches applicant's claimed range of proportions set forth in claim 2 at lines 44-46 of column 9. Accordingly, with respect to applicant's response, the Examiner strongly disagrees with applicant's statement that "Dobashi et al. does not disclose or suggest the use of hydrogenated aliphatic/aromatic copolymer petroleum

resins and/or aliphatic/aromatic copolymer petroleum resins, as presently claimed" as set forth in the last paragraph of page 3 of their response.

3. The Examiner further requests applicant to provide a copy of the original PTO Form 892 submitted in connection with the Examiner's initial Office action, Paper No. 5 mailed August 13, 2002 in order to complete the electronic file wrapper maintained in the Patent Office, since this document has apparently been lost or mislaid by the Patent Office.
